Derek Chen 3/2/2014 The same old, same old The same old, same old. It's not a good sign when a game tries to play like it's in an RPG series and doesn't. Don't get me wrong, I love the FFVII series a lot and nothing beats the gameplay it has. For the most part though, it's not the same anymore with every game moving in a different direction. As far as graphics go, this game does look good but I found it way too repetitive, long and boring. Although it has a gripping story line, it's almost too much to handle. The game really tries to be one of the best RPGs ever. All the new parts and features make this game really worth playing but it's not necessarily the same. The story has heartwarming moments but also dark parts that any fantasy reader will love. Though, I'm a little disappointed with the characters because they were way too weak, especially the Princess. It really takes a toll in the long run and that's a big turn off. I guess it still has nice graphics, though, and the combat is still wonderful. So, if you're looking for a good fantasy game, it's worth a shot. Daniel Amador 4/27/2013 RPG good, not great. I thought this game was pretty good, despite the combat being kind of repetitive. I played the game as a role player with two others and it was a lot of fun. The graphics were pretty good and the story was fascinating. Overall, I would say this game is a 6.8/10. Jonathan Dibek 2/23/2013 Good but I'd rate it higher. The combat system is easy to pick up and doesn't take much thought to perform. In fact, it's so easy to pick up, you can pretty much battle without a problem. The story is captivating, the world is vibrant, and the gameplay is enjoyable. However, it also has a lot of problems which lower the overall score for the game. For starters, the classes are not very useful as they don't really serve much purpose in battle. I actually found myself reusing a character after he or she took damage from enemy attacks. The main area where this really impacts is the magic system. While bff6bb2d33

**Chinese Currency Watch: CNH Rises as Yen Falls By James Ang / Markets Editor Fri, Sep 07, 2013 - Page 6 The New China Foreign Exchange (NCH) index rose by 1.3 percent last week, its biggest weekly increase since the summer of 2007, an indication that offshore capital is returning to the renminbi. The official yuan weakened to 6.735 yesterday from 6.717 last Monday, the lowest level since May of this year, as the US dollar index fell in its weekly decline and as sentiment soured over the latest US-China talks held yesterday. The CNH, however, stayed flat amid mixed offshore and overseas markets. The yen declined for a fourth week in five, with the Nikkei 225 index ending down 3.6 percent last week. It was the biggest single-week fall in two months, and it fell to ¥103.31 against the dollar from ¥104.86 last week. Asian shares tumbled, as the yen weakened in the face of diverging sovereign-**

China's current-account surplus widened by CNH 8.3 billion (US\$1.33 billion) in July to ¥310.4 billion from ¥301.8 billion in June, the biggest monthly surplus in the past five years. The country's trade surplus widened to ¥419.2 billion in July from ¥325.4 billion in June, its biggest monthly surplus in the past 20 years. Last week's offshore yuan retreat failed to curb foreign investors' interest in the renminbi, with the CNH rising slightly. Overseas investors increased their holdings of offshore renminbi by 2.4 percent to ¥1.431 trillion in July from ¥1.387 trillion in June.**

considered an important determinant. During competitive exercise, athletes often experience a wide range of heart rates (HR). During that competitive phase, many variables can influence peak HR. This article examines the influence of HR on the gas exchange variables that determine maximal oxygen uptake of a group of runners who participated in a state cross-country championship. Seven of the fastest runners (mean speed, 42.0 km.h<sup>-1</sup>; mean age, 21.6 years; mean body weight, 68.0 kg) were selected for this study because their time trial course was largely flat and they remained approximately the same distance from the start to finish for each of the four races of the championship. Peak HR was determined for each runner, as was the oxygen uptake at peak HR. Compared to the values for runners of similar speed, peak oxygen uptake was lower but a wide range existed (66.6 to 73.2 ml.kg<sup>-1</sup>.min<sup>-1</sup>). There were, however, no differences in performance on the flat course between the HR group and two control groups of runners who finished at similar speeds but whose HRs were approximately 20% and 30% less than the HR of the HR group. The highest value for maximal oxygen uptake was obtained by the runners whose HR was less than their peak HR. However, these runners also had the highest peak HR of all the runners. There was no relation between peak HR and performance; therefore, peak HR is not an important determinant of maximal oxygen uptake of these runners. Spanish Prime Minister Mariano Rajoy said
