In April 2015, AutoCAD 2012 Classic was released. This version supports AutoCAD LT 2.0, and 2D drawing features are only available to AutoCAD LT customers. The new version of AutoCAD Classic is mainly a 2D and 3D design tool. New features include: The ability to create and edit 2D and 3D geometry, including multipatch and isometric drawing styles. More efficient drawing tools for 2D and 3D geometry. New physics-based design tools, such as the built-in mesh and surface tools. New nesting tools for 2D and 3D drawings, including rules, blocks, and groups. Improved pick and trace tools for 2D and 3D geometry. Automatic rasterizing of 2D images and repositioning of imported DWG files in the drawing window. Since 2001, each major release of AutoCAD has included a build of the legacy productivity app AutoCAD LT, with different features, some of which have only been available in AutoCAD. Run the update.exe as administrator. Copy the update.reg to the root of the Autocad directory. Re-open the Autocad software. If you have prior versions: Go to Settings and under System, click on Import Keys. A dialog box will open, select the update.reg and import it. Restart Autocad and enjoy the update. It's free to download, the latest installer (as of today) is version 2009_5.1.2. When you run the installer, choose "Upgrade" to install the latest features. Now, assuming that your version of Autocad is still version 2009_5, run Autocad 2010 software, locate the folder where your install is located (C:\Program Files\Autodesk\Autocad 2009\...), find the file autocad.inf (most likely in C:\Program Files\Autodesk\Autocad 2009\acad.inf) and change the number of version you have in the [ACAD] registry tag to 10, e.g.: [ACAD] version=9 name=Autocad 2009 Save that file. Then, run Autocad, click on the File menu, choose "Import Keys..." and locate the Autocad.inf and autocad.reg files that you just created. Finally, restart Autocad, go to the Files menu and choose "Settings...". Then go to the System tab and the Import Keys button should be enabled. (BTW: you can always open your registry editor (regedit.exe) to check for errors. There should be none) Food: Golden Roasted Corn on the Cob As I'm writing this, the sky is the glorious, glorious blue-sky blue it is in the days of summer. The corn is still standing in the field as the sun goes down. I can see the crows and little black birds gathering on the tips of the ears. And the corn is as good as fresh, husked, and grilled out in the coals as the sun goes down. Of course, it
